

FOR IMMEDIATE RELEASE

SuiteFiles to debut at Accountex 2018 alongside Bridge³

Accountants looking for a new way to manage their digital files efficiently will get a chance to talk to both SuiteFiles and its exclusive reseller, Bridge³, at Accountex 2018.

Due to be held from 23 – 24 May at ExCeL London, Accountex 2018 promises to be one of the biggest events yet. Live demonstrations and discussions of the SuiteFiles software will take place on the company's stand, number 570.

Fully integrated with Xero HQ and GDPR compliant, SuiteFiles is built on the commonly used Microsoft Office 365 platform, making it easy for firms to transfer, manage and work with their files in the cloud, allowing them to create and edit files, collaborate with colleagues and share documents.

Its integrations with both Xero and Office 365 ensure SuiteFiles is the accountant's go-to source for their business files, emails, and templates – providing a distinct advantage over other document management systems like DocuSoft, which don't feature the same levels of collaboration.

Bridge³ is one of the UK's leading innovative creators of digital accountancy solutions and has led the way in creating new innovations for a number of existing software packages for accountants and is already a key partner for Xero in the UK.

Having spotted the obvious benefits of SuiteFiles, Bridge³ has become a key UK partner and is positioned to manage installations and provide ongoing training and support to practices across the UK.

Stephen Smallwood, Managing Director at Bridge³ and accounting practice, Thorne Widgey, said: "Online management systems, such as SuiteFiles, have come on in leaps and bounds in recent years thanks to the evolution of the cloud.

"We are delighted to be representing SuiteFiles at the upcoming Accountex show, as we believe that it is the solution that many practices are calling out for.

"In the years to come, our profession is likely to become more and more automated and SuiteFiles is a simple, effective step in this direction, which can considerably help firms to improve their efficiency and management of files.

"Thanks to its use of the cloud, partners, directors and staff can easily access the information they need anywhere and at any time, while still ensuring the data held is secure."

In recent years, Bridge³ has used its connections to co-develop dedicated accountancy solutions to assist firms and businesses with WorkflowMax, Xero Practice Manager and Xero Workpapers.

It has also played a key role in assisting Thorne Widgey with the creation of Xero for Education financial software – a dedicated package aimed at the specific reporting needs of academies and schools.

It believes that through its latest partnership with SuiteFiles – as its exclusive reseller – it can revolutionise the way practices manage their files, allowing them to migrate information easily, as well as create prepopulated templates to make regular work processes more efficient.

“At Bridge³ we are very fortunate in that we are able to thoroughly test all of our solutions out within a busy working practice, so we know that the solutions we offer work effectively – creating less, rather than more work for firms,” added Stephen.

Fully compliant with the upcoming General Data Protection Regulation (GDPR), SuiteFiles works with a number of Office 365 applications, including integration with Outlook through a dedicated add-in.

Notes to Editors

About Bridge³

At Bridge³ our goal is to make your life that little bit easier by making your professional business software work for you.

‘What can we do to make our clients’ lives better?’ – has become something of a mantra to us.

We look at the software you are already using, see what fits, what isn’t working for you as well as it should and what needs to be tweaked or changed.

Just drop us in and, rather like applying oil to an engine or a squeaking door hinge, you’ll find that we will very quickly have your software systems running as smoothly and efficiently as possible.

If you are already harnessing the benefits of Xero Accounting Software or are considering implementing Xero in your business, talk to Bridge³.

As a Practice Studio Partner, Bridge³ are one of only four firms in the UK that Xero recommend to carry out Xero Practice Manager (XPM) installations for other accountants, because of our knowledge and experience in the subject. Bridge³ were selected, trained and certified by Xero to carry out these implementations.

As a Certified Practice Studio Partner, we can help you get the most out of XPM by setting everything up for you, tailoring it to your needs and training your staff.

About Suite Files

SuiteFiles is a clever add-on that allows you to work smarter with cloud-based applications. It allows you to:

- Manage everything – files, emails, videos, templates, client records – in one place, and make it accessible to your staff
- Set up user access controls for confidential filing – enabling your practice to file staff information without everyone being able to view it
- Create, manage and access document, folder and email templates straight from SuiteFiles – making them available to staff straight away and even prepopulating file and email templates with your client information
- Search across all your files from Outlook – SuiteFiles Outlook is like a mini version of the web app, meaning that you can easily search across your entire file system without leaving your inbox! Use the filters to refine your search, or look within specific folders.
- Manage your files – secure storage means you can manage and edit your documents through SuiteFiles and by integrating with Xero Practice Manager, you'll get all the benefits of working in the cloud
- Backup your files – securely backup and restore your files in the cloud, allowing you to quickly recover from any IT mishap
- Link directly to Xero Practice Manager so all files, emails and correspondence are available in both
- Search for documents easily – using a powerful search feature, with additional filters to help you refine your search
- Access your most recent documents through the 'recent tab'
- Scan in documents – reducing clutter and making files easily accessible to other staff
